

AADITYA PARAB

PERSONAL PROFILE

A motivated 3rd-year Engineering (IT) student with a strong foundation in programming and web development. Skilled in designing and building responsive web interfaces, with hands-on experience in creating interactive websites and basic applications.

Currently focusing on frontend development and UI design, with a keen interest in crafting user-friendly and visually appealing digital experiences. Possesses a good understanding of web technologies along with problem-solving abilities and logical thinking.

Gained practical exposure through academic and personal projects, demonstrating the ability to turn ideas into functional solutions. Actively seeking opportunities to enhance technical expertise, gain real-world experience, and grow as a frontend developer.
